These containers offer a wide range of applications, in particular as storage of materials to which no special storing regulations apply, warehouse of material on the detached workplace, as ...

Corrosive tank containers are built using materials that resist corrosion, such as stainless steel or special plastics capable of handling harsh chemicals without breaking down.

These containers offer a wide range of applications, in particular as storage of materials to which no special storing regulations apply, warehouse of ...

The 32'x30'x25' Global Industrial(TM) Folding Bulk Shipping Container is designed to securely hold & ship product, then ...

The 32'x30'x25' Global Industrial(TM) Folding Bulk Shipping Container is designed to securely hold & ship product, then collapse to half its height to reduce return shipping costs. It ...

In this whitepaper, THIELMANN engineers have examined the mechanical characteristics of both two and three-welded seam containers to determine overall product integrity.

From compact studio container apartments to spacious multi-story container mansions, or even commercial container offices and shops, we can design and build it all.

Built with reinforced steel frames and corrosion-resistant materials, our container classrooms withstand harsh weather, daily wear, and even seismic activity. The structural integrity meets ...
