Founded in 1946 as the Stanford Research Institute and independent since 1970, SRI is a pioneer in creating and applying innovative solutions for governments, businesses, foundations, and ...

As Sri Lanka's energy demands evolve, hybrid renewable systems combining solar, wind, and battery storage are becoming the new normal. ISL is proud to be part of this ...

The project will feature advanced technologies such as bi-facial or mono PERC modules, string inverters, and tracking systems, and is expected to set a benchmark for future ...

For almost 80 years, SRI has collaborated across technical and scientific disciplines to discover and develop groundbreaking products and technologies, delivering ...

Based on an extensive evaluation of various energy storage technologies, four (4) key solutions have been identified as the most suitable options for Sri Lanka which can be implemented ...

SRI formally separated from Stanford University in 1970 and became known as SRI International in 1977. SRI describes its mission as creating world-changing solutions to make people safer, ...

This report delves into the transformative phase of Sri Lanka's energy sector, highlighting the growing adoption of renewable energy sources like solar and wind power.

With solar battery storage Sri Lanka, you can store excess daytime production and use it later in the evening. This means you consume more of your own solar energy instead of ...
