Can pumped hydro storage facilities be built in Sweden?

Fortum has initiated a two-year feasibility study to explore potential for new pumped hydro storage facilities in Sweden. The feasibility study will focus on three areas: Lekstjörnen, next to Fortum's hydropower plant in Trångslet in Dalarna County, and Bastviken and Häljessjö in Värmland County.

Does Fortum have pumped hydro storage capacity in Sweden?

The Finnish utility already has around 90 MW of installed pumped hydro storage capacity in Sweden. Fortum has initiated a two-year feasibility study to explore potential for new pumped hydro storage facilities in Sweden.

Who is pumped hydro storage?

Pumped Hydro Storage was started by enthusiasts with a background from renewables, and with a strong desire to make a difference in the energy transition. The World's Most Sustainable Balancing Power Enabling a Fossil-Free Generation Pumped Hydro's and SENS team has an extensive experience of renewable energy development and planning

What is the future of Swedish energy system?

Summary of literature review. In case of the Swedish energy system, there are uncertainties surrounding the future of nuclear power plants, the anticipated increase in wind and solar PV installations, electrification trends, and the role of hydrogen in the steel industry [34, 35].

Grid-scale, long-duration energy storage has been widely recognized as an important means to address the intermittency of wind and solar power.

If you visit a Swedish hospital or emergency department, Patient Registration is able to gather the necessary information from you to issue you a MyChart access code and instructions.

At the Swedish Orthopedic Clinic, our team of doctors and caregivers is committed to helping you move with less pain, return to the activities you love and feel better overall.
