---

A supercapacitor is an energy storage medium, just like a battery. The difference is that a supercapacitor stores energy in an electric field, whereas a battery uses a chemical reaction.

Skeleton Technologies, headquartered in Tallinn, specializes in the production and advancement of high-energy and power-density ultracapacitors. Now, the company revealed ...

Tallinn-based Skeleton Technologies, a company that manufactures and develops high-energy and power-density ultracapacitors, announced on Friday, October 13, that it has secured ...

Founded in 2009 and headquartered in Tallinn, Skeleton Technologies has emerged as a global leader in advanced energy storage solutions. The company specializes in ...

The company maintains its headquarters and electrical engineering operations in Tallinn, Estonia, while its manufacturing facilities are located in Saxony and its materials development in ...

Skeleton Technologies is the world's largest manufacturer of supercapacitors for mission-critical infrastructure and industry, founded in 2009 in Estonia. Power today is more than electricity --...

Offering supercapacitors and SuperBattery technology, they serve automotive, grid, and industrial sectors. With high energy density and eco-friendly designs, their manufacturing facilities in ...

To meet the surging energy demands of AI, Skeleton's patented Curved Graphene technology delivers the highest energy and power density for supercapacitors and high-power batteries.
