While most of the installed base of NaS batteries is in Japan and in the USA, the first European projects have been installed in Reunion Island (France), Germany, and the UK.

Overview Construction Operation Safety Development Applications External links A sodium-sulfur (NaS) battery is a type of molten-salt battery that uses liquid sodium and liquid sulfur electrodes. This type of battery has a similar energy density to lithium-ion batteries, and is fabricated from inexpensive and low-toxicity materials. Due to the high operating temperature required (usually between 300 and 350 °C), as well as the highly reactive nature of sodium and
