What percentage of Tunisia's electricity is renewable?

In 2022, only 3% of Tunisia's electricity is generated from renewables, including hydroelectric, solar, and wind energy. While STEG continues to resist private investment in the sector, Parliament's 2015 energy law encourages IPPs in renewable energy technologies.

Who manages the energy sector in Tunisia?

As of March 2020, the Tunisian electricity sector is managed by the Ministry of Energy, Mines and the Energy Transition. For the past two years, renewable energy portfolio was managed by the Ministry of Industry, Small and Medium Size Enterprises.

Who produces electricity in Tunisia?

State power utility company STEG controls 92.1% of the country's installed power production capacity and produces 83.5% of the electricity. The remainder is imported from Algeria and Libya as well as produced by Tunisia's only independent power producer (IPP) Carthage Power Company (CPC), a 471-MW combined-cycle power plant.

What are Tunisia's energy projects?

One third of the projects will be for wind farms and two thirds for solar photovoltaics. Tunisia's national grid is connected to those of Algeria and Libya which together helped supply about 12% of Tunisia's power consumption in the first half of 2023.

A German-Tunisian joint venture recently deployed a compressed air energy storage (CAES) system in Sfax. It's like a giant underground balloon storing enough energy to ...

To meet increasing demand for electricity and promote energy conservation, the GOT allows private companies and households utilizing co-generation and renewable energy ...

Scaling Up Energy Storage to Accelerate Renewables Energy storage is fundamental to stockpile renewable energy on a massive scale.

oyment is a growing trend in today's energy market. In recent years, BESS has been a key enabler for decarbonised energy distribution, providing a quick response electricity service
