Which region has the largest data center uninterruptible power supply market?

The Northern region of India holds a significant share of the Data Center Uninterruptible Power Supply (UPS) market, accounting for approximately 30% of the total market in 2023. The region's growth is driven by the rapid digitalization of businesses in key cities such as Delhi, Noida, and Chandigarh.

What is an uninterruptible power supply?

An uninterruptible power supply has redundant configurations and dual bus capabilities. Thus, it requires less uptime and can provide facility-wide protection for sensitive electronics. Moreover, an uninterruptible power supply provides power without blackouts, brownouts, sags, surges, and noise interference.

Why do data centers need an uninterruptible power supply?

They are equipped with an uninterrupted power supply. Furthermore, the data centers are connected to the internet, and with the help of an uninterruptible power supply, the data centers work smoothly without any interruption in internet connectivity. An uninterruptible power supply has redundant configurations and dual bus capabilities.

The India Uninterruptible Power Supply market was valued at \$57.4 Million in 2020, and is projected to reach \$106.0 Million by 2029 growing at a CAGR of 7.09% from 2021 to 2029.

Despite being a reliable and highly responsive system guaranteeing an immediate power supply in the event of a power failure, the major concern about the uninterruptible ...
