The offices and production facility are 80% solar heated using a concrete core temperature control system, while a varnishing chamber is also ...

This power will be generated by a 100-kilowatt photovoltaic system installed on the opera house's roof by energy supplier Wien Energie. The modules are green instead of blue, ...

In addition to mandating solar panels and energy-efficient buildings, Vienna is now heating thousands of homes with geothermal energy instead of planet-heating natural gas. It's ...

The offices and production facility are 80% solar heated using a concrete core temperature control system, while a varnishing chamber is also supplied with solar thermal energy via a heater ...

The new Sport Arena in Vienna is home to what is currently the largest PVT system in Europe, with 1,130 collectors from the German supplier Sunmaxx PVT. It surpasses the installation at ...

Austria has installed Europe's largest photovoltaic-thermal (PVT) solar system at a stadium, using Sunmaxx modules combined with geothermal energy and brine heat pumps to ...

We aim to increase solar electricity production fivefold by 2025, and by 2030 some 530,000 Viennese citizens will be supplied with solar power made in Vienna. The roofs and facades of ...

The fossil free city quarter Wientalterrassen in Vienna leads the way since 2023, with the apartments being supplied by renewable heat only, and has been awarded several prizes.
