Designed for councils managing surface water or responding to contamination events, they offer mobile, resilient water treatment with rapid setup, minimal sitework, and a full treatment train in ...

Leading this approach is the 2020 installation of New Zealand's first floating solar array at the Rosedale wastewater treatment plant in Auckland. This project demonstrates how ...

This project demonstrates how New Zealand could double the country's power supply without requiring additional land. It serves as a test for future deployments on other ...

Designed for councils managing surface water or responding to contamination events, they offer mobile, resilient water treatment with ...

While traditional stationary solar power systems are normally cumbersome to install and difficult to relocate, folding PV containers make use of innovative articulated panels ...

We will explain why solar photovoltaic containers are particularly suited to the New Zealand context with the help of technology, real cases, and practical advice.

With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three ...

Floating solar panels on wastewater ponds offer a multifaceted answer. They generate renewable energy, improve water quality in the treatment ponds and reduce costs. ...
