Does ampyr own the Wellington Bess project?

Ampyr now owns 100% of the 400MW Wellington BESS project in New South Wales. Ampyr Australia has acquired Shell's 50% stake in the 300MW Wellington battery energy storage system (BESS) in New South Wales. With its Wellington BESS stage two project (100MW), Ampyr now owns 100% of the 1000MWh Wellington project.

How will energy storage affect New York's energy grid?

In June 2024, New York's Public Service Commission expanded the goal to 6,000 MW by 2030. Storage will increase the resilience and efficiency of New York's grid, which will be 100% carbon-free electricity by 2040. Additionally, energy storage can stabilize supply during peak electric usage and help keep critical systems online during an outage.

What is New York's energy storage goal?

New York's Climate Leadership and Community Protection Act (Climate Act) codified a goal of 1,500 MW of energy storage by 2025 and 3,000 MW by 2030. In June 2024, New York's Public Service Commission expanded the goal to 6,000 MW by 2030.

What is New York's energy storage roadmap?

The Roadmap proposed a comprehensive set of recommendations to expand New York's energy storage programs to cost-effectively unlock the rapid growth of renewable energy across the State and bolster grid reliability and customer resilience.

Supported by our high-calibre partners, ZEN Energy and Fluence, the Wellington Stage 1 BESS will play a critical role in an ...

Fluence Energy, Inc. has been selected by AMPYR Australia to construct the 300 MW / 600 MWh Wellington Stage 1 Battery Energy Storage System (BESS) in New South ...

If you've ever wondered how cities like Wellington keep the lights on during storms or why your neighbor's solar panels never seem to waste a drop of sunshine, you're in the ...

In conclusion, as Fluence embarks on this landmark project with AMPYR Australia, it not only sets a precedent for future battery storage initiatives but also demonstrates the ...

Elevate's battery energy storage systems (BESS) will assist the integration of large amounts of offshore wind and other intermittent resources, provide grid-supporting services, redefine grid ...

Elevate's battery energy storage systems (BESS) will assist the integration of large amounts of offshore wind and other ...

As climate pledges tighten globally, the Wellington model proves storage-integrated photovoltaics aren't just viable--they're becoming the new normal. The real question isn't whether others will ...

The Wellington Stage 1 BESS is AMPYR's first grid-scale battery energy storage system to reach financial close in Australia. This project is scheduled to be energised in 2026, ...
