Is energy storage a good investment in Europe?

Compared to classic renewables, energy storage has really only become an investable asset in Europe over the last few years on the back of technology advances, market price signals, and government support mechanisms.

Where does SSE Renewables operate?

SSE Renewables operates across the United Kingdom, Ireland, Continental Europe, and Japan. ENGIE UK is a utility company and Independent Power Producer (IPP) specializing in renewable energy generation, flexible energy storage, and energy supply solutions for businesses.

Why should you invest in battery storage in Europe?

In Europe, the capacity of renewable energy sources is growing very rapidly, while traditional power plants are slowly being decommissioned. That's creating a unique new opportunity for investors amid the emerging demand for battery storage, which provides balance to electricity markets.

How do energy storage assets make money in Europe?

For short-duration energy storage assets, there are really three key revenue streams for energy storage assets in Europe. The first one is capacity payments, which have become a broadly implemented policy measure by governments to support system reliability and incentivize the installation of certain new power asset types.

As specialists in the management, conversion and storage of electrical energy, we offer a comprehensive product portfolio with a power range from 300 to 40,000 watts.

Explore the top 25 EMEA energy storage solutions companies driving the transition to a sustainable and renewable energy future.

Discover the current state of energy storage companies in Europe, learn about buying and selling energy storage projects, and find ...

Company profile: MVS, founded in 2000, specializes in battery and power supply systems, offering a wide range of solutions for industries such as marine, vehicles, energy storage, fast ...

In the future, Germany, Italy and Poland will be the hot spots in the European energy storage market. The German energy storage market is expected to grow rapidly from 8 GW in 2023 to ...
