Currently, around 3.4GW of BESS capacity is operational in the UK. The newly identified 7.6GW pipeline would complement this, ...

From mountainous pumped hydro to cutting-edge cryogenic and compressed air technologies, the UK is deploying a broad portfolio of energy storage solutions to ensure energy security, ...

Statera Energy has officially energised the UK's largest battery energy storage system (BESS) - the 300MW Thurrock Storage site - marking a significant milestone for the ...

This post investigates the state of the UK battery storage pipeline, year-to-date figures and an insight into the appetite to develop ...

Currently, around 3.4GW of BESS capacity is operational in the UK. The newly identified 7.6GW pipeline would complement this, potentially reaching the CP2030 goal when ...

Long Duration Electricity Storage (LDES) facilities provide vital back-up for the renewable power system - working like giant batteries that store electricity created by wind ...

From mountainous pumped hydro to cutting-edge cryogenic and compressed air technologies, the UK is deploying a broad portfolio of energy storage ...

The 300MW Thurrock Storage project, developed by Statera Energy, is now energised and delivering electricity flexibly to the network across London and the south east.
