Why is cls sometimes used instead of self as an argument in Python classes? For example: class Person: def __init__(self, firstname, lastname): self.rstname = firstname self.

For a language-agnostic consideration of the design decision, see What is the advantage of having this/self pointer mandatory explicit?. To close debugging questions where OP omitted a ...

This expert hub covers everything Irish homeowners need to know about solar energy Ireland, including how solar panels work, what affects cost and savings, available SEAI grants, and ...
