What is the energy storage project?

The Energy Storage Project aims to support Kosovo's energy security and transition to a cleaner energy future.

What is the energy strategy for Kosovo?

The Kosovo energy strategy includes increasing RES capacity to 35% of electricity consumption by 2031. Aiming for 600 MW wind, 600 MW solar PV, 20 MW biomass & at least 100 MW of prosumer capacity, to reach a total installed RES capacity of 1600 MW by 2031. Lignite exploitation in Kosovo started in 1922.

What percentage of energy is produced in Kosovo?

Around 90% percent of energy production in Kosovo is from lignite, a soft coal that produces toxic pollution when burnt. Official figures show Kosovo has the world's fifth largest lignite reserves of 12-14 billion tonnes.
