What is a supercapacitor used for?

Supercapacitors, also called ultra capacitors or double layer capacitors, are specially designed capacitors that possess very large values of capacitance--as high as 12,000 F. They can be recharged very quickly and are used primarily for energy storage. Supercapacitor construction and operation. (Image: ES Components.) How do supercapacitors work?

What are the three types of supercapacitors?

EDLCs, pseudocapacitors, and hybrid capacitors are the three main types of supercapacitors. Each type is explained in detail below: A supercapacitor's capacitance and power density are enhanced by its electric double-layer capacitor (EDLC). An EDLC stores charge electrostatically at the electrode/electrolyte interface.
