This solar power station is perfect for homes and apartments use. The unit is perfect for backup power in any emergency or blackout. It can be used indoors. It is also great for camping and ...

According to the World Bank, Yemen has the lowest level of electricity connection in the Middle East, with only 40% of the population having access to electricity. Rural areas are particularly badly affected. Industrial concerns, hospitals and hotels have their own back-up generators. To address these shortages, a 340-MW gas-fired power plant is under construction-and close to completion-at Marib. Further expansion to the facility, which will add an additional 400 MW of ou...
