We provided a bespoke modular renewable energy solution, including a Solar Power Package installed separately from the main oil platform ...

Today's off-grid systems combine solar PV panels with lithium batteries in a single container unit. During the day, the panels generate power and charge the batteries.

Prioritizing resilience and sustainability, UNOPS installed high quality and robust solar systems built to withstand Yemen's harsh terrain, remote locations and extreme weather conditions.

We design and engineer custom Solar Power Systems for Oilfield Services, Gas Pipelines, Off-shore Drilling, Injection Sites, Wellhead Locations and Related Oil and Gas Service Companies.

By designing a solar module factory to power its own operations, an investor can turn a significant regional liability into a ...

Today's off-grid systems combine solar PV panels with lithium batteries in a single container unit. During the day, the panels generate ...

UNDP has established a hybrid mini-grid plant project in Ash Shamayatayn, Taiz Governorate, combining solar and wind power to ...

Abstract - This paper presents a case study for a recent Company approved offshore oil and gas development project aims to install 19 platforms with off-grid photovoltaic (PV) and battery ...
